

JAF Series

(Jump Air Flow)

Barrel pumps

JAF Series (Jump Air Flow) is an ideal pumping solution for filling and emptying barrels up to 200 liters. The pumping is made safely without any contact with the pumped product.

JAF1 - FILLING BARRELS

JAF2 - FILLING AND EMPTYING BARRELS

JAF1 and JAF2 are equipped with a safety quick coupling and a connection for the transfer of the product.

Convenient and compact, this unit is modular and can be customized according to your needs. It can include the following elements:

- JAF (1 or 2) pump
- JUMP trolley with integrated drainer
- JUMP barrel
- Hose reel
- Hose

Compact size: 85cm x 70cm
